OCTOBER 31, 2022

1. NATURE OF OPERATIONS

Newport Exploration Ltd. (the “Company”) was incorporated on September 19, 1979 under the Business Corporations Act, British Columbia and is considered to be in the exploration stage with respect to its exploration and evaluation asset. Based on the information available to date, the Company has not determined whether its exploration and evaluation asset contains ore reserves. Recoverability of the carrying amount of the exploration and evaluation asset is dependent on successful development and commercial exploitation, or alternatively, sale of the respective areas of interest. The Company, receives royalty payments related to a retained interest in certain petroleum licenses in Australia (note 5). The Company has no ability to determine the quantum or sustainability of future royalty payments, and as a result, there is no assurance the Company will continue to receive payments from its 2.5% gross overriding petroleum royalty. The receipt of royalty payments are not indicative of additional near-term income or any future income as the Company has no information to support or validate the expectation of future receipt. Any future royalty receipt is treated as fortuitous.

The Company’s head office and principal address is 202 – 2168 Marine Drive, West Vancouver, British Columbia, Canada, V7V 1K3. The Company’s registered and records office is 1500 – 1055 West Georgia Street, Vancouver, British Columbia, Canada, V6E 4N7.

These unaudited condensed interim financial statements have been prepared on the basis of accounting principles applicable to a going concern which assumes that the Company will be able to continue in operations for the foreseeable future and will be able to realize its assets and discharge its liabilities in the normal course of operations. To date, the Company has financed its operations primarily through issuance of common shares and from the receipt of royalty payments. The Company currently has cash and short term investments totalling \$3,717,064 and net working capital of \$5,105,165 which the Company believes is sufficient to fund its current business plans in the foreseeable future. In the longer term, additional equity or debt financing may be necessary to fund exploration and general and administrative activities or mine development or if royalty payments are not sufficient to fund such activities.

2. STATEMENT OF COMPLIANCE

These unaudited condensed interim financial statements were authorized for issue on December 14, 2022 by the directors of the Company.

These unaudited condensed interim financial statements, including comparatives, have been prepared in accordance with International Accounting Standard 34 “Interim Financial Reporting” (“IAS 34”) using accounting policies consistent with the International Financial Reporting Standards (“IFRS”) issued by the International Accounting Standards Board (“IASB”) and Interpretations of the IFRS Interpretations Committee.

Newport's Australian income tax receivable is a result of the Company incurring eligible deductible expenses for Australian income tax purposes, which offsets the payable. The Company had a net Australian income tax liability at October 31, 2022 of \$945 which consists of accrued withholding taxes on its Royalty receivable at October 31, 2022 of \$452,535 (July 31, 2022 - \$774,450) and accrued Australian income tax receivable of \$451,590 (Jul 31, 2022 - \$365,014).

13. FINANCIAL AND CAPITAL RISK MANAGEMENT

Fair value estimates of financial instruments are made at a specific point in time, based on relevant information about financial markets and specific financial instruments. As these estimates are subjective in nature, involving uncertainties and matters of significant judgment, they cannot be determined with precision. Changes in assumptions can significantly affect estimated fair values.

The carrying value of cash, receivables and accounts payable and accrued liabilities approximate their fair value because of the short-term nature of these instruments. The fair value of short term investments was \$2,621,857 at October 31, 2022 (July 31, 2022 - \$2,604,251), a level 1 fair value measurement.

Financial risk factors

The Company's Board of Directors has the overall responsibility for the established method and oversight of the Company's risk management framework.

The Company is exposed in varying degrees to a variety of financial instrument related risks and monitors the risk management processes, inclusive of documented investment policies, counterparty limits, and controlling and reporting structures. The type of risk exposure and the way in which such exposure is managed is provided as follows:

Credit risk

Credit risk is the risk of financial loss associated with counterparty's inability to fulfill its payment obligations. The Company's credit risk is primarily attributable to cash and equivalents, short-term investments and receivables, the carrying value totalling \$5,246,417, represents the Company's maximum exposure to credit risk. Management believes that the credit risk concentration with respect to financial instruments is remote because cash and equivalents and short-term investments are held with reputable Canadian financial institutions. Receivables consist mainly of the Company's royalty income. The royalty income comes from one company, and is typically received within 30 days after the quarter of production. The Company does not consider any of its current receivables past due. The Company believes any credit risk associated with its receivables is remote due to the historical success of collecting receivables.
